**DETAILED ACTION**

***Formal Matters***

Claims 20-21 are pending and under consideration.

***Response to Amendment***

The rejection of claim 8 has been rendered moot by Applicant's amendment and is thus withdrawn.

The objection of claim 9 has been rendered moot by cancellation of the claims and is thus withdrawn.

New issues are set forth below.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 20 is rejected under 35 U.S.C. 102(a) as being anticipated by Reid et al. (1998).

The claim is drawn to a hOAT polypeptide that is at least 95% homologous to the amino acid sequence of SEQ ID NO: 2. The Reid reference teaches the cloning and expression of a human ROAT1 renal p-aminohippurate transporter (page 235, Figure 1). The hROAT1 polypeptide is 99.4% identical to the polypeptide of SEQ ID NO: 2 (see Sequence Comparison B, attached), thus the claim is anticipated.

***Conclusion***

Claim 20 is rejected.

Claim 21 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
